United Motors Service is the *Official* Sales and Service Organization in the United States and Canada for the manufacturers of the following Specialized Automotive Equipment:

- | | |
|---|--|
| *Delco-Remy Starting, Lighting & Ignition | *AC Speedometers, Oil Filters, Air Cleaners, Gas Strainers, Fuel Pumps, Gauges & Spark Plugs |
| *Delco Batteries | North East Starting, Lighting & Ignition Speedometers, Car Heaters |
| *Harrison Radiators and Car Heaters | *Guide "Twilite," "Tilt Ray" and other Lamps, Teltale, etc. |
| *Klaxon Horns | |
| *New Departure Ball Bearings | |
| *Hyatt Roller Bearings | |
| *Delco-Lovejoy Hydraulic Shock Absorbers | |

**Standard Equipment on Chevrolet Cars*

The PURPOSE of United Motors Service is to fulfill the service obligation of its principals to car owners, car dealers and the trade in general by providing convenient and economical maintenance and warranty service in the field for the products listed above

Your local Authorized Service Station or United Motors Branch can save you time and money in connection with the servicing of these special equipments

HOW TO ORDER

The 25 United Motors Branches and 3,000 Authorized Service Stations are in a position (according to line) to supply parts for all the apparatus listed above, on any automotive make or model so equipped.

Order from an Authorized Service Station or Branch of United Motors Service. The nearest Branch of United Motors Service will gladly advise the names and addresses of Authorized Service Stations most conveniently located to service your orders, perform repairs, etc.

Prices (U. S. A. only) for all parts listed in this catalog are shown opposite the part number. Add approximately 60% to compute Canadian list prices. All prices are subject to change without notice. Prices in this catalog have been corrected to July 15, 1933.

UNITED MOTORS SERVICE
INCORPORATED

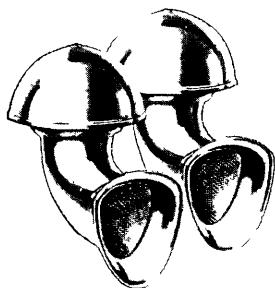

NEW KLAXON HORMS

Add 1933 smartness to older model cars

The "Trumpet Type" and the "Current Projector Type" horns are the universally popular models, and these up-to-the-minute Klaxon accessory horns are in keeping with the current trend. A definite demand for this type has been created by similar standard equipment horns.

Accessory packages contain Universal Brackets for mounting on tie rod and under headlamps, also extra push button if independent foot control is desired. All models have chromium plated screen in throat of projector.

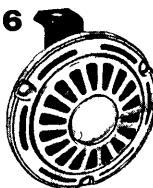

KLAXON 28 MATCHED SET

All that a fine warning signal should be, this compactly built horn, in an attractive new design, is offered in popular matched pairs. The note is deep, rolling and effective—finish is full polished chromium.

Part No. 1849118 List Price \$12.00
Matched Set

KLAXON 16

FOR 1931 CHEVROLET

Mounts under the right headlamp of the 1931 Chevrolet—opposite equipment horn—making a matched pair. Package includes cross-over wire with clips for concealed installation

Part No. 1313-A List Price \$2.50

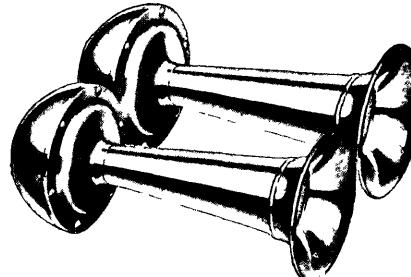

266-T HORN RELAY

Especially recommended for use with Matched Pairs of horns. Easily installed, under the hood, and connected into the push-button circuit, it insures delivery of full current to the horns and adds greatly to their effectiveness. 3½ inches long.

List Price \$1.00

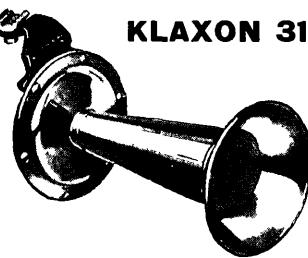

KLAXON 31-C MATCHED SET

A full chromium, quality horn in matched sets adapted for mounting on older models. Carefully tone-blended at the factory to give a very effective and pleasing signal.

Part No. 1849082 List Price \$9.00
Matched Set (1931 Models)

KLAXON 31

FOR 1932 & 1933 CHEVROLETS

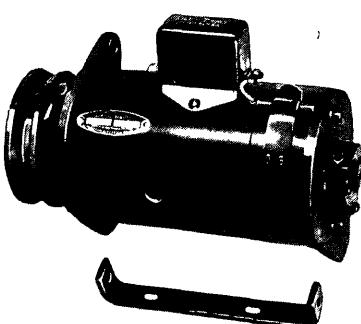

Mounts on the right side of the car, in the same manner as the bracket for the equipment horn on the left side. A complete new wiring harness for the two horns is furnished in the package to replace the wiring to the original horn.

Part No. 1844560—For 1932 List Price \$4.50
1849066—For 1933 4.50

SPECIAL HIGH OUTPUT GENERATOR

Delco-Remy generator No. 967-C is recommended for radio equipped cars, or trucks used in highway freight service, when trouble is experienced in keeping the battery properly charged. Does not have low cut-in for police car service.

This generator is designed for installation on Chevrolet passenger cars, and commercial vehicles to provide additional current required when the electrical load is excessive and driving conditions unusual. This generator has

a higher charging rate than the standard unit and the output does not fall off materially at high speed.

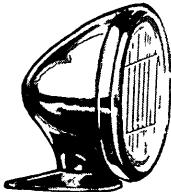

Has third brush regulation with 200° thermostat control. Generator comes complete with special pulley and mounting bracket. Installation easily and simply made without additional parts or special wiring.

Part No. 967-C List Price \$17.50

An allowance made to car owners and dealers if the old generator is returned.

Teltale

Teltale is an effective, non-electric, self-focusing reflector producing a brilliant signal visible up to 1000 feet. A guide lens protects the lacquered silver reflector surface. Inexpensive, easily attached, no wires or bulbs. Heavily chrome plated.

Fender Teltale—Clear Lens, pair .. \$4.00
(Illustration at left)

Rear Type—Ruby Lens, Price Each . \$1.25
(Illustration at right)

Introducing
**THE NEW INERTIA-CONTROLLED
DELCO-LOVEJOY SHOCK ABSORBERS**

A weighted, inertia-controlled valve, shown at the left, closes automatically when shock absorber resistance is needed, and opens when resistance to spring action would cause undesirable stiffness and hard riding. Each shock absorber acts independently of the others.

Patented Delco-Lovejoy Inertia-Controlled shock absorbers afford a degree of riding comfort far superior to anything ever before achieved in a general-purpose automobile. They are the only shock absorbers to permit free movement of the axle and, at the same time, to control the movement of the car body. They take hold only when the inertia of the car body is disturbed.

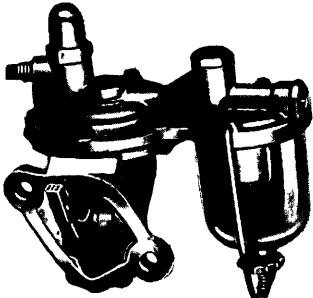

On ordinary driving surfaces, Inertia-Controlled shock absorbers let the car springs operate freely. The ride is soft and buoyant. The car glides smoothly—the wheels are free to follow the contour of the road.

Moreover, there is no front-end pull-down, as with the conventional shock absorber, when the car meets a hole in the road. The axle is free to drop to the limit of spring action without pulling the car down with it, and it returns to normal road level without transmitting the axle movement to the car body. The action in each shock absorber is independent. The result is a ride of amazing perfection.

These exclusive new shock absorbers, in both single and double acting types, will be available for replacement on previous and present car models at surprisingly low cost. For latest information and prices, get in touch with nearest Authorized Lovejoy Distributor or Branch of United Motors Service.

AC PRODUCTS

FUEL PUMP SERVICE

One complete but inexpensive AC Fuel Pump enables you to render exchange service on all Chevrolet Six Cyl. models. Recommended flat rate repairs to car owners on fuel pump overhauls are \$2.00 detached, and \$2.50 on drive-in jobs—less your regular discount.

It is to your advantage to render service by exchange, the reoperated pump to be placed in stock after being completely overhauled by an Authorized AC Service Station or United Motors Branch.

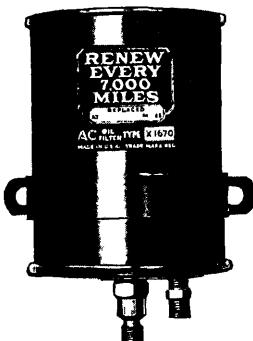

Part No.	Models	Price
856198	1929-30-31-32-33	\$5 00

SPARK PLUG SERVICE

A complete change of Spark Plugs every 10,000 miles will save your car owners one gallon of gas out of every ten—plus improved engine performance. You can show them why the change is necessary with an AC Spark Plug tester—which tests the plug in the engine under actual operating conditions. See your AC Service Station or United Motors Branch regarding special Spark Plug assortments with which this valuable tester may be obtained.

Type	Models	Price

Z	1928	60
G-12	1929-32	60
K-9	1933	60
843650 Tester	All Cars	Free with plug assortment

OIL FILTER SERVICE

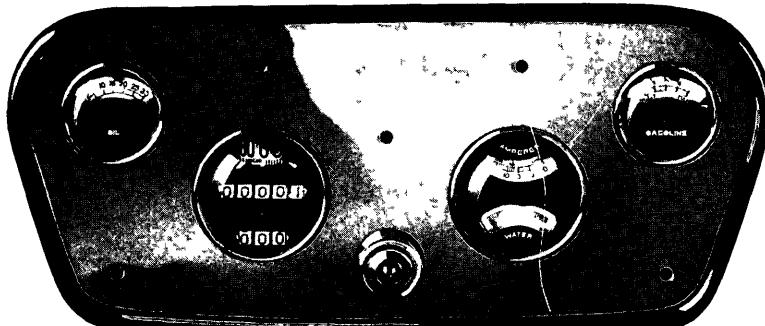

Dirty oil means eventual expensive repairs.

The AC Oil Filter removes dirt, sludge and abrasive substances.

Oil may be used several thousand miles when there is AC Filter protection.

The AC Oil Filter is specially designed for six cylinder Chevrolets—easily installed—it pays for itself, in resultant saving of oil changes alone.

INSTRUMENT PANEL SERVICE

The Remo Universal Package may be installed on any car. To reduce repair charges use Remo.

Part No.	Description	Models	Price
866936	Complete Remo-Pkg.	All	\$3.75
866934	Can Remo Fluid	All Remo Injectors	.60

REMO SERVICE

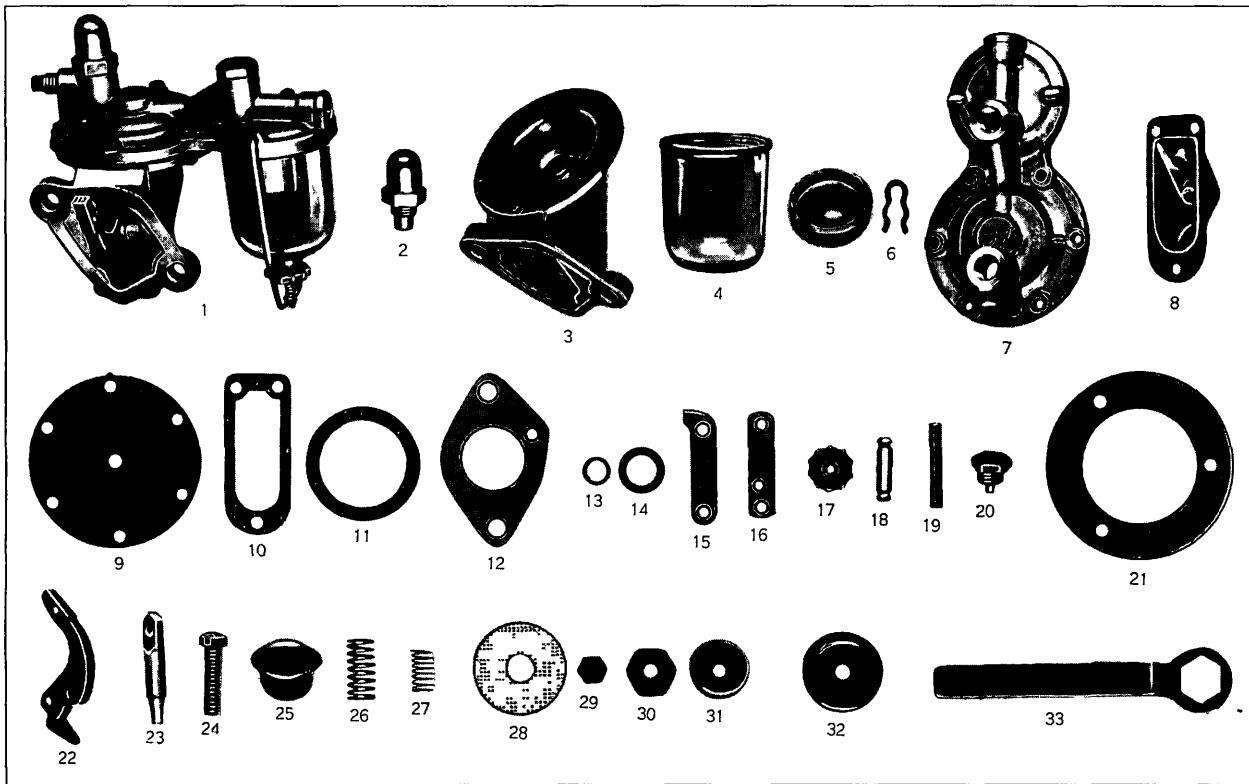

Remo used each 1000 miles will dissolve the sticky gum in the engine—gum that is the first and underlying cause of hard carbon deposits. Dissolve the gum and it will be blown out through the exhaust. After each injection of Remo a new can of Remo fluid should be installed.

FAST SELLING PARTS

For your convenience, we list below certain fast moving service parts which should be in the stock room of every concern servicing Chevrolet cars. All are genuine parts identical with the parts used in the original equipment on Chevrolet models and are produced and guaranteed by the manufacturers of the standard original equipment. Hyphenated figures showing years used on ("29-32," etc.) are inclusive. In cases where Chevrolet's part number is different from the United Motors part number, the Chevrolet number is shown in parenthesis following the name of part.

FAST SELLING PARTS

For your convenience, we list below certain fast moving service parts which should be in the stock room of every concern servicing Chevrolet cars. All are genuine parts identical with the parts used in the original equipment on Chevrolet models and are produced and guaranteed by the manufacturers of the standard original equipment. Hyphenated figures showing years used on ("29-32," etc.) are inclusive. In cases where Chevrolet's part number is different from United Motors part number, the Chevrolet number is shown in parenthesis following the name of part.

3	1842806	Condenser Package	1922 28	.50					

COMPLETE PARTS LIST

MODELS	NAME OF PART	ILLUS NO	PART NO	PRICE EACH			
1922 to 1928	Ignition Coil (Chev. No. 1843169) (Price includes one Part No. 1842365 bracket which must be ordered separately. Also order one Part No. 1842806 Condenser Package \$0.50.)	1-2-3	526-B	\$ 3.00			
1929 to 1932	Ignition Coil (Chev. No. 362702) (Price includes one Part No. 1842364 which must be ordered separately.)	4-5	526-B	3.00			
1933	Ignition Coil and Lock Switch						
	IMPORTANT NOTE Ignition Coil and Lock Switch Assemblies are not sold as complete units. In most cases replacement of—coil less the switch—is all that is necessary. If the complete assembly is required it is necessary to order coil less switch as separate items. Handling lock type coil and switch assembly service in this way reduces the cost to car owner, enables dealers to keep down inventory investment and does not call for a new lock which in most cases would not take same key as old lock necessitating the use of two keys for the car, whereas original lock set-up provides for one key fitting all locks—doors, ignition, spare tire, etc.						
1924 to 1932	Clip, High Tension	6	829537	.05

The tungsten used in Delco-Remy ORIGINAL EQUIPMENT contact arms and points is made by the patented "cut-rod" process, which gives maximum contact life and current conductivity. The patented arm assemblies are accurately manufactured from special materials selected for wearing qualities and positive performance at highest speeds.

GENERATOR

FAST SELLING PARTS

For your convenience, we list below certain fast moving service parts which should be in the stock room of every concern servicing Chevrolet cars. All are genuine parts identical with the parts used in the original equipment on Chevrolet models and are produced and guaranteed by the manufacturers of the standard original equipment. Hyphenated figures showing years used on ('29-32,' etc.) are inclusive. In cases where Chevrolet's part number is different from the United Motors part number, the Chevrolet number is shown in parenthesis following the name of part.

GENERATOR CUT-OUT RELAY

FAST SELLING PARTS

For your convenience, we list below certain fast moving service parts which should be in the stock room of every concern servicing Chevrolet cars. All are genuine parts identical with the parts used in the original equipment on Chevrolet models and are produced and guaranteed by the manufacturers of the standard original equipment. Hyphenated figures showing years used on ("29-32," etc.) are inclusive. In cases where Chevrolet's part number is different from the United Motors part number, the Chevrolet number is shown in parenthesis following the name of part.

FAST SELLING PARTS

For your convenience, we list below certain fast moving service parts which should be in the stock room of every concern servicing Chevrolet cars. All are genuine parts identical with the parts used in the original equipment on Chevrolet models and are produced and guaranteed by the manufacturers of the standard original equipment. Hyphenated figures showing years used on ("29-32," etc.) are inclusive. In cases where Chevrolet's part number is different from United Motors part number, the Chevrolet number is shown in parenthesis following the name of part.

HARRISON RADIATOR

Genuine Harrison Radiators should always be used when making replacements. The Harrison Radiator is a scientifically designed temperature control device, which is specially engineered for each model. Substitute radiators cannot provide the same amount of heat diffusion in the same cubic space. This unequalled efficiency has made Harrison the largest radiator manufacturer in the world and Harrison Radiators are standard equipment on all Chevrolet models. Genuine Harrison radiators (less shell) and convenient and complete repair service are available through Authorized Harrison Service Stations and Branches of United Motors Service.

†13-H	Ledge Handle Case	\$ 8 70
	†Standard Equipment 1929-30-31-32-33	

Delco Batteries are standard equipment on Chevrolet models. The 13-H was used in 1929-30-31 and 32 cars and is identical with the model 13-N used in 1933 models.

Model 15 L is a REVERSE Assembly OVERSIZE battery for Chevrolet cars. It has 15 plates in a 13 plate Hard Rubber case and is a 94 A H battery.

A complete line of genuine Delco Batteries fully charged and ready for service is available through Delco Battery Service Stations and Branches of United Motors Service. Ask for prices and information on Delco Batteries for all Chevrolet models and other Delco Batteries to fill your complete battery demands. Delco Batteries are supplied wet and fully charged unless otherwise requested.

GUIDE

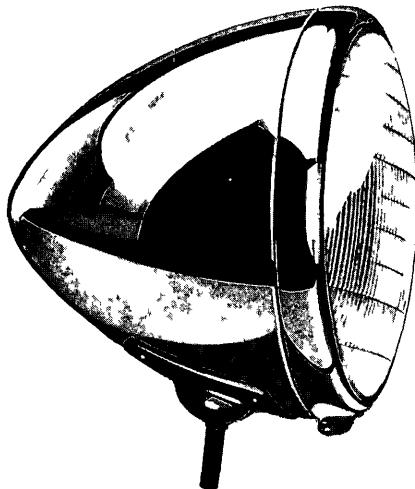

GUIDE LAMPS

Guide Lamps have been used as standard equipment on Chevrolet since 1929. Guide Lamps have been legally approved for use in all states requiring approval. Twilite lenses must be used for replacement with the corresponding reflectors and vice versa, to continue to meet various state requirements.

Twilite LENSES				Twilite REFLECTORS				Twilite MOULDINGS

HEADLAMPS

Guide "Twilite," "Tilt Ray" or "Guide Ray" Headlamps, also Guide Side Lamps or Fender Lamps, and Tail or Combination Lamps, are standard equipment on Chevrolet and a wide range of passenger cars, trucks and tractors. Replacements are available from any United Motors Branch or Authorized Guide Lamp Service Station. Specify make, year, model of car and finish of lamp.

FAST SELLING PARTS

For your convenience, we list below certain fast moving service parts which should be in the stock room of every concern servicing Chevrolet cars. All are genuine parts identical with the parts used in the original equipment on Chevrolet models and are produced and guaranteed by the manufacturers of the standard original equipment. Hyphenated figures showing years used on ("29-32," etc.) are inclusive. In cases where Chevrolet's part number is different from the United Motors part number, the Chevrolet number is shown in parenthesis following the name of part.

GUIDE

GUIDE DRIVING AND GUIDE PASSING LAMPS

For Safe Driving at Night

GUIDE DRIVING LAMP

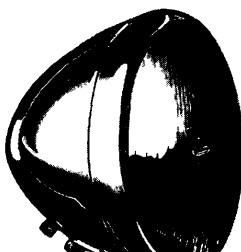

Driving at night becomes as safe as day-time driving when you have this lamp to light your way. It throws a concentrated beam down the highway that lights up signs, curves, and any obstructions long before you get to them. It picks up objects far past the range of your driving headlights. This new Guide Lamp provides greater safety in night driving at all speeds.

Compare the penetrating beam from the Guide Driving Lamp with the light from the ordinary "bright" or driving head lamps. If anything is ahead you'll see it in plenty of time at any speed.

GUIDE PASSING LAMP

With this equipment you are not "in the dark" as to what's ahead when you pass oncoming cars. No matter how bright their lights are, the Guide Passing light illuminates your side of the road. The edge of the road, the ditch, or any obstructions in the highway are clearly illuminated at a safe distance ahead. It penetrates through the lights of oncoming cars, and does not handicap the approaching driver.

Compare the strong beam from the Guide Passing Lamp with the light from ordinary "dimmer" or "courtesy" headlights. It illuminates the road when and where you need it most while passing oncoming cars.

The new Guide Passing and Driving Lamps are chromium plated and very attractive, improving the appearance of any car. They are equipped with a well designed bracket for easy mounting under Headlamps. The driving lamp is connected to automatically turn on and off with the "bright" or "driving" headlights and the passing lamp with the "dim" or "courtesy" headlights on your car. They also can be operated independently of your regular lamps.
